## 1 TUGAS DISKUSI 6 TUTORIAL ONLINE

### 1.1 DASAR PEMROGRAMAN R

1

```
[ ]: data_scan <- scan("text.txt")
      matriks2 <- matrix(data_scan, nrow = 4, ncol = 10, byrow = TRUE)

      print(matriks2)
```

|      | [,1] | [,2] | [,3] | [,4] | [,5] | [,6] | [,7] | [,8] | [,9] | [,10] |
|------|------|------|------|------|------|------|------|------|------|-------|
| [1,] | 75   | 90   | 35   | 51   | 50   | 56   | 35   | 80   | 70   | 80    |
| [2,] | 68   | 29   | 58   | 66   | 89   | 81   | 86   | 70   | 94   | 67    |
| [3,] | 35   | 47   | 67   | 87   | 37   | 30   | 66   | 58   | 59   | 55    |
| [4,] | 67   | 76   | 80   | 78   | 60   | 90   | 69   | 80   | 76   | 87    |

2

```
[ ]: tiket_pesawat <- read.csv("tiket_pesawat.csv", header = TRUE, sep = ",")

      # Menampilkan data untuk memeriksa hasilnya
      print(tiket_pesawat)
```

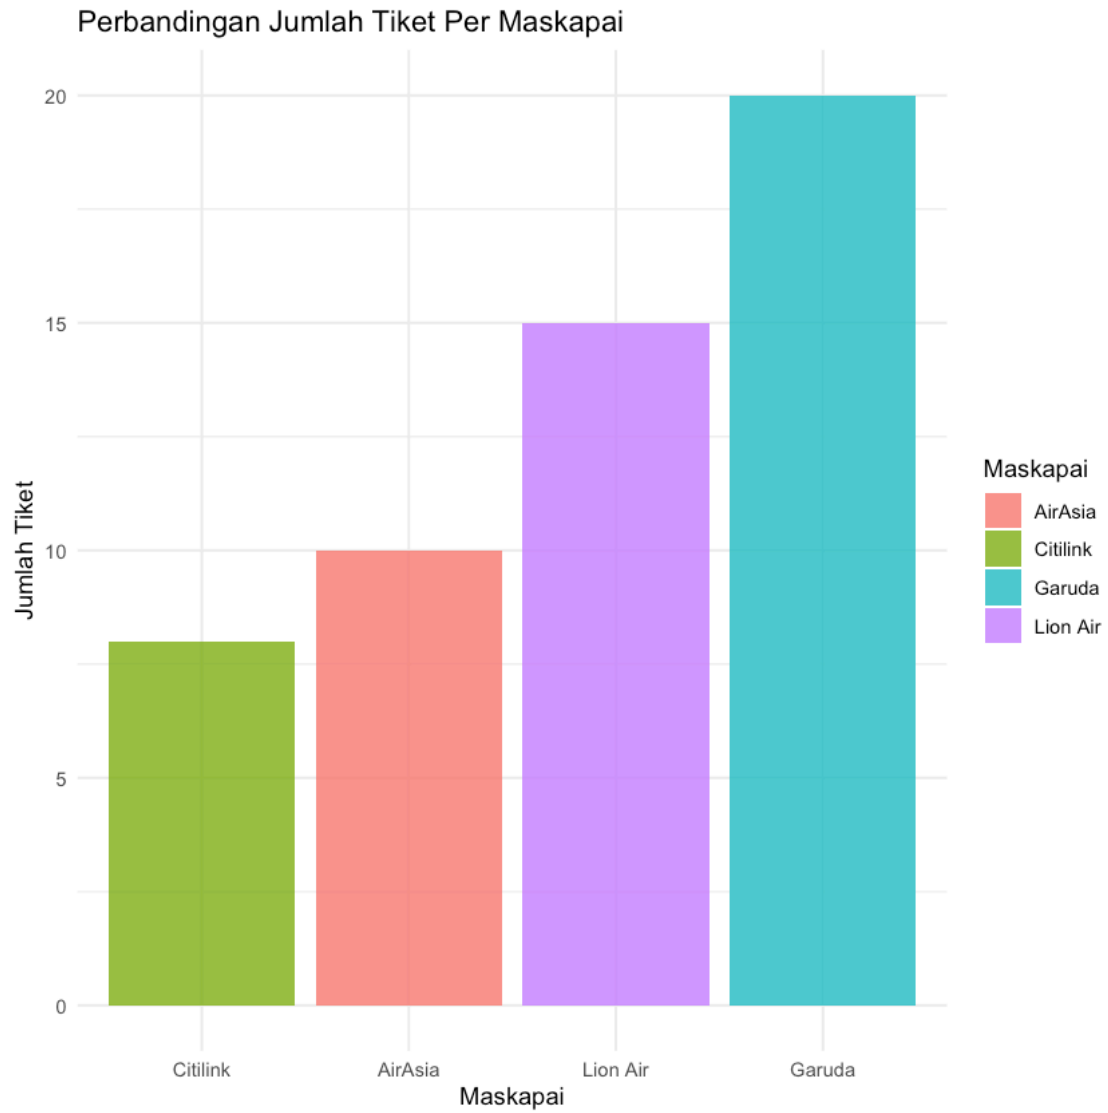

|   | ID_Transaksi | Maskapai | Rute             | Jumlah_Tiket | Harga_Tiket |
|---|--------------|----------|------------------|--------------|-------------|
| 1 | 1            | Garuda   | Jakarta-Bali     | 20           | 1500000     |
| 2 | 2            | Lion Air | Jakarta-Surabaya | 15           | 900000      |
| 3 | 3            | AirAsia  | Jakarta-Medan    | 10           | 1200000     |
| 4 | 4            | Citilink | Jakarta-Lombok   | 8            | 1100000     |

3

```
[ ]: # Untuk install libaray ggplot  
  
install.packages("ggplot2")
```

The downloaded binary packages are in  
/var/folders/wh/h1n1j9\_n2b7cvf4gtvf\_8p980000gn/T//Rtmp1CvBDZ/downloaded\_packages

```
[10]: library(ggplot2)  
  
tiket_pesawat <- read.csv("tiket_pesawat.csv")  
  
ggplot(data = tiket_pesawat, aes(x = reorder(Maskapai, Jumlah_Tiket), y =  
  ↳Jumlah_Tiket, fill = Maskapai)) +  
  geom_bar(stat = "identity", alpha = 0.8) +  
  labs(title = "Perbandingan Jumlah Tiket Per Maskapai",  
        x = "Maskapai",  
        y = "Jumlah Tiket") +  
  theme_minimal()
```
